

VIAFY CORE SOLUTION

Everything you need to manage your fleet.....
on one single platform!

Live GPS Tracking

Our Live Map gives you real-time visibility of every vehicle in your fleet. View precise GPS location and speed. Get visual cues for speeding buses and off-route/off-time alerts. Overlay planned routes and stops and compare them with your day-to-day actuals. Click on any vehicle to get live driver, speed, and route information. Live Map shows you everything you need to know when you need it.

Routing: Building, Optimization and Management

Routing doesn't have to be a headache. Whether you're planning routes from scratch or optimizing your current runs, Viafy's artificial intelligence helps you get the job done right and fast. What about route editing and management? Our easy-to-use and intuitive platform will make routing as easy as ABC.

Fleet Management + Live Diagnostics

Everyone knows that a healthy fleet means a healthy wallet. When we combine our GPS tracking capabilities with the ability to read the information directly from your vehicle's port, you get a 24/7 fleet maintenance solution. Create unlimited services, register every maintenance done to your vehicles, get notifications for scheduled revisions, and receive live alerts for mechanical or electrical error codes..

Customizable Reporting

Turn your data into insights with our powerful reporting system. Choose from various reports ranging from speeding vehicles to mileage tracking to excessive idling and route performance information. Compare planned vs. actuals or use GPS data to view historic vehicle activity. Need something else? Build your custom reports and set up automated deliveries and notifications.

And more!

- Web-based solution with two years of unlimited cloud storage.
- With our Admin and Driver app's, access Viafy from anywhere at any time.
- Reduce unnecessary work through our FREE Integrations with Student Information Systems, third-party routing solutions, and Payroll software.
- Enjoy our FREE and unlimited top-notch, on-demand training and support.
- Exclusive access to Viafy's Academy for a collection of videos and self-help guides for you to make the most of your Viafy experience.

VIAFY ADD-ONS

Need more? We've got you covered!

Parent App

Empower parents and students through our Parent App. Allow them to set custom proximity (time and distance) alerts to notify them when their bus is coming to their stop. Send quick communications to app users. All while reducing parents time-consuming calls.

Our Parent App is a win/win situation!

V-Pass (Student Ridership and Attendance)

Track student ridership and attendance through the use of RFID technology. View live information for students riding the bus or jump into your historical reports. Receive for students scanning into the wrong bus and/or stop.

Ability to integrate with our Parent App to provide parents with visibility of their kids as they get on or off the bus.

V-Clock (Timesheets)

Track drivers working hours, input contract and wage information, get overtime alerts, and dig into our reporting system. Our V-clock solution makes it easy for employees to register and keep track of their hours while helping administrators stick to the budget. What's even better? The possibility of integrating all this into your payroll system.

V-Trip (Field Trips)

Centralize field trip planning. Involve teachers, coaches school and transportation directors. Send automated notifications for new requests and follow them through the approval process-track buses out on trips. Enjoy the field trip; you've got Viafy!

V-Check (Pre and Post-Trip Inspection)

Safety has always been at the heart of school transportation. Our V-Check solution allows you to capture protocol compliance. Choose between existing templates or create your own; users will use our Driver App to complete forms and produce a digital audit trail to improve accountability and transparency while reducing your liabilities.

V-Safe (Safety Button)

Hope for the best plan for the worst. In the case of an emergency, our integrated Safety Button will allow drivers to send a distress signal with bus information, GPS coordinates, address, and date and time of activation.
